

JOURNAL OF COMPUTATIONAL MATHEMATICS

计算数学 (英文版)

Volume 44 Number 6 November 2026

CONTENTS

- Boya Zhou, Ruimin Gao and Qifeng Zhang* A Multiple-invariants Preserving Scheme for Modified Two-component Euler-Poincaré Equations (1583)
- Yuzhi Lou, Hongxing Rui and Xiufang Feng* The Quadratic Discontinuous Finite Volume Element Schemes for Elliptic Problems (1608)
- Qiang Han and Yurong Liu* High Order Probabilistic Numerical Methods for Forward Backward Stochastic Differential Equations (1631)
- Zhenrong Chen, Yanping Chen and Jianwei Zhou* On the Superconvergence of Collocation Methods Based on Two Post-processing Techniques for Fractional Integro-differential Equations with Weakly Singular Kernels (1662)
- Weiping Bu, Xueqin Zhang, Weizhi Liao and Yue Zhao* Finite Element Method with Grünwald-Letnikov Type Approximation in Time for a Constant Time Delay Subdiffusion Equation (1683)
- Ran Zhang, Xin-Jian Xu and Chuan-Fu Yang* Inverse Nodal Problem for the Sturm-Liouville Operator with Three Discontinuities (1709)
- Yule Zhang, Jihong Zhang and Jia Wu* Characterizing the Rate of Convergence of the Augmented Lagrange Method for Nonlinear Programming (1730)
- Xinye Li, Sai Qi and Zhoushun Zheng* The Exponential Scalar Auxiliary Variable Approach for the Landau-Lifshitz Equation (1749)
- Ling Chang Kong, Xiao Shan Chen and Michael Kwok-Po Ng* Riemannian Trust-Region Method for the Log-determinant Model of Hermitian Matrix Eigenproblems (1787)
- Haiming Song, Hao Wang, Jiageng Wu and Jinda Yang* Stochastic Proximal Linearized ADMM for Sparse Distribution Control Problem Constrained by Random Elliptic Equation (1811)
- Jianhua Peng and Jingyong Tang* Cubically Convergent Two-step Gauss-Newton Method for Nonsmooth Equations with Application to AVE (1831)
- Guoliang Zhang, Hongtao Chen, Qiaoling He and Jingwei Li* A Hybrid Two-level Finite Element Method for the Stationary Natural Convection Problem and Parallel Implement (1848)
- Xian-Jun Long, Jia-Lin Nie, Gao-Xi Li and Zai-Yun Peng* An Accelerated Preconditioned Primal-dual Gradient Algorithm for Nonconvex Composite Optimization Problems with Applications (1867)
- Jianchao Bai, Yang Chen, Yu-Hong Dai and Yong-Jin Liu* A Faster Proximal-indefinite Augmented Lagrangian Method with $\mathcal{O}(1/k^2)$ Convergence Rate (1890)
- Shuo Chen, Bin Shi and Ya-Xiang Yuan* On Underdamped Nesterov's Acceleration (1912)

JOURNAL OF COMPUTATIONAL MATHEMATICS (Bimonthly)

Vol. 44 No. 6
